Danny Holloran

Senior Fullstack Developer

(314) 882-8326 · hello@danholloran.me · danholloran.me · github.com/grimicorn · linkedin.com/in/dan-holloran · St. Louis, MO

// SUMMARY

Dynamic Senior Frontend & Fullstack Developer with **14+ years** of experience building responsive, performant web applications and leading engineering teams. Proven track record of reducing load times, improving user engagement, and directing cross-functional teams of 10+ developers. Equally comfortable owning complex frontend architecture with Vue.js and React, diving into Fullstack work with Laravel and PHP, or stepping into an engineering leadership role. I build and operate my own AI agent tooling and fold AI coding agents into my daily development workflow, with 5+ years of TypeScript across Vue/Nuxt and React work. Looking to bring deep technical expertise and a collaborative leadership style to an innovative startup or mid-sized product team, remotely.

// EXPERIENCE

Senior Fullstack Developer

Sep 2025 – Present · @Ample · ample.co · Cincinnati, OH

• Architected and maintain crossroads.net, driving ongoing performance improvements and reducing technical debt across a modern JavaScript stack

• Collaborate cross-functionally with designers, translating product requirements into a polished frontend experience

• Lead pair programming sessions and code reviews to elevate team code quality and accelerate junior developer growth

• Drive adoption of AI coding agents across the team, running Claude Code as the primary workflow for backend feature development and bringing AI-authored changes through pairing and code review

• Leveraged AI agents to close testing gaps that time constraints previously left open: built a full Playwright e2e suite (sign-in, sign-up, password reset, profile updates) for an inherited, half-finished Auth0 integration, and codified always-on unit tests in a project CLAUDE.md so agent-written code ships tested and reviewable by default

Career Sabbatical

Mar 2025 – Sep 2025 · @Life · United States

• My position was eliminated, and I decided to take it as a career sabbatical to travel, recharge, and return with a fresh perspective and renewed focus.

Photography

Lead Developer

Feb 2021 – Mar 2025 · @Tradier · tradier.com · Charlotte, NC

• Redesigned frontend platform architecture, achieving a **25%** improvement in load times and a measurable lift in user engagement metrics

• Built dynamic, high-performance single-page applications using Vue, Nuxt, and Tailwind CSS, reducing bounce rates by **10%**

• Mentored 2 junior developers through structured code reviews and pair programming, fostering a culture of continuous learning and shared ownership

• Partnered closely with UX/UI designers to translate wireframes into polished, responsive web applications, boosting overall user experience
